About the event

On 12 June 2019, the International Forum – Modern OSH Organisation in Europe will be held for the fifth time. The event takes place every two years and is hosted alternately in Germany or Luxembourg. The organizers are the *German Social Accident Insurance Institution for the energy, textile, electrical and media products sectors* (BG ETEM), the *Luxembourg Accident Insurance Association* (AAA) and the *ISSA Section for Electricity, Gas and Water*.

The focus of the event is on a bilateral exchange between Luxembourg and Germany on current topics in the field of occupational safety and health (OSH) management systems, OSH organisation and other related prevention topics always with a view to Vision Zero.

In addition to interesting lectures (e.g.: *How convince CEOs and general direction to really take into account OSH in their strategy*, Dominique Vacher, DVConseils) the official launch of the Contractor Management brochure prepared by the ISSA Electricity Section awaits you as a special highlight. The event serves as a platform for the exchange of information and for networking between national and international OSH experts.

Don't miss this special opportunity to exchange personal experiences.

Talks will be given in German, English and French language with simultaneous interpretation.

Topics

- DIN ISO 45001
- Successful contractor management
- Vision Zero in transport
- Campaigns in Germany and Luxembourg
- Current EHS topics
